

# Public EB-1A Petition Sources for an AI Petition Builder

A curated source list and product-design blueprint for building an AI-assisted EB-1A petition drafting and evidence-organization workflow.

This PDF summarizes publicly available EB-1A petition examples, official USCIS policy sources, RFE/AEO resources, and practical product design ideas. Use these sources as references for structure, evidence mapping, and adjudication logic. Do not copy petition text blindly, and have any final legal filing reviewed by a licensed immigration attorney.

## 1. Public successful EB-1A petition examples and templates

| Source                                                   | What it gives you                                                                                                                                            | Why useful for AI petition builder                                                                                  | Link                        |
|----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|-----------------------------|
| Razvan Marinescu - EB-1A I-140 complete petition example | Main EB-1A petition, I-140, I-907, I-485, LaTeX template, timeline, and strategy notes. He states his EB-1A was approved and explains his criteria strategy. | Excellent structure for evidence indexing, criteria mapping, exhibit linking, and final petition assembly.          | <a href="#">Open source</a> |
| Razvan EB-1A GitHub repository                           | LaTeX template/package for a complete EB-1A I-140 petition, with anonymized elements.                                                                        | Useful for document generation format, table of contents, exhibit layout, and PDF generation workflow.              | <a href="#">Open source</a> |
| Ryan-Rhys Griffiths GitHub EB1A repository               | Anonymized administrative forms, petition PDF, petition.tex, reference letters, auxiliary exhibits, and review evidence.                                     | Very useful because it includes multiple document types: petition, forms, letters, exhibits, and evidence folders.  | <a href="#">Open source</a> |
| Ryan-Rhys EB-1A blog                                     | Explains the successful self-petition process and open-sourced template as another data point.                                                               | Good for process narrative and practical DIY workflow.                                                              | <a href="#">Open source</a> |
| Alexey Inkin - Medium article and GitHub                 | Describes a first-attempt approval without RFE and links to a very detailed petition package.                                                                | Strong example for software/technology EB-1A storytelling and criteria explanation.                                 | <a href="#">Open source</a> |
| Alexey Inkin GitHub repository                           | Complete petition, forms, and process notes described as a detailed free instruction set.                                                                    | Strong source for productizing process steps: intake, evidence, criteria selection, drafting, and filing checklist. | <a href="#">Open source</a> |
| Kirill Nikitin GitHub EB-1A repository                   | LaTeX source code for an approved EB-1A petition template derived from Razvan Marinescu.                                                                     | Helpful for pattern comparison across approved technology/science petitions.                                        | <a href="#">Open source</a> |
| Andrey Chemist EB-1A example                             | EB-1A petition PDF example and EB2-NIW examples, with disclaimer that it is not legal advice.                                                                | Good older petition structure and science-domain reference.                                                         | <a href="#">Open source</a> |
| EB1Greencard.info downloads                              | Sample EB-1A petition materials for DIY cases.                                                                                                               | Potential supplementary reference; check terms before scraping or reusing.                                          | <a href="#">Open source</a> |
| Oscar's Green Card EB-1A sample                          | Paid redacted EB-1A I-140 petition example in PDF/Word format.                                                                                               | Potential paid template comparison source if Word-format examples are useful.                                       | <a href="#">Open source</a> |

## 2. Official USCIS and government sources for the rules engine

| Source                                            | What it gives you                                                                                                                                                      | How to use in AI app                                                      | Link                        |
|---------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|-----------------------------|
| USCIS EB-1 page                                   | Official EB-1 overview. EB-1A requires extraordinary ability in sciences, arts, education, business, or athletics through sustained national or international acclaim. | Use as canonical eligibility baseline.                                    | <a href="#">Open source</a> |
| USCIS Policy Manual - Volume 6, Part F, Chapter 2 | Official USCIS policy on EB-1A criteria and final merits determination.                                                                                                | Build criteria-by-criteria evidence checklist and final-merits evaluator. | <a href="#">Open source</a> |

| Source                                       | What it gives you                                                                                         | How to use in AI app                                                              | Link                        |
|----------------------------------------------|-----------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|-----------------------------|
| USCIS 2024 EB-1A guidance update             | USCIS guidance issued October 2, 2024 clarifying evidence types for extraordinary ability EB-1 petitions. | Include current-policy checks so old templates do not drive outdated outputs.     | <a href="#">Open source</a> |
| USCIS E11 RFE template                       | Official Request for Evidence template for I-140 E11 extraordinary ability cases.                         | Use for an RFE-risk simulator that flags weak claims and unsupported evidence.    | <a href="#">Open source</a> |
| USCIS AAO non-precedent decisions repository | Searchable Administrative Appeals Office decisions, including EB-1A denials and edge cases.               | Use to understand denial patterns, rejected arguments, and adjudicator reasoning. | <a href="#">Open source</a> |

### 3. Suggested AI product architecture

#### Module 1: Intake Builder

Collect profile, field/niche, proposed endeavor, publications, patents, judging, awards, memberships, salary, media, leadership roles, original contributions, recommendation contacts, and supporting evidence.

#### Module 2: Evidence Classifier

Map every uploaded document to one or more USCIS criteria: awards, membership, published material, judging, original contribution, scholarly articles, exhibitions/showcases, leading/critical role, high salary, and commercial success.

#### Module 3: Criteria Strength Scorer

Score each criterion as strong, medium, weak, or risky. Explain why using USCIS policy, RFE-template logic, and AAO decision patterns.

#### Module 4: Final Merits Narrative Builder

Generate the sustained-acclaim and top-of-field story. This is the most important layer because USCIS does not merely count three criteria; it evaluates totality of evidence.

#### Module 5: Petition Draft Generator

Generate the cover letter or petition with exhibit citations. Force every factual claim to link back to uploaded evidence to reduce hallucination risk.

#### Module 6: RFE/NOID Risk Simulator

Use RFE template language and AAO denial patterns to ask: What would a strict officer challenge?

### 4. Product positioning and legal caution

Use the public examples as reference templates, not as text to copy. Some repositories and sites include disclaimers that the material is not legal advice and may become outdated as USCIS forms, fees, and policy guidance change.

**Suggested positioning:** AI-assisted EB-1A petition drafting and evidence organization tool for attorneys and self-petitioners. The tool does not provide legal advice. All outputs must be reviewed by a licensed immigration attorney before filing.

### 5. Best starting dataset list

- 1 Razvan Marinescu EB-1A petition and GitHub template.
- 2 Ryan-Rhys Griffiths EB-1A repository.
- 3 Alexey Inkin EB-1A Medium article and GitHub full petition.
- 4 Kirill Nikitin EB-1A GitHub repository.
- 5 Andrey Chemist EB-1A PDF example.
- 6 USCIS Policy Manual EB-1A chapter.

- 7 USCIS E11 RFE template.
- 8 USCIS AAO non-precedent decisions.

---

Prepared as a practical reference summary for EB-1A AI petition-builder research. Verify all sources and USCIS policy before relying on them in a live product or filing workflow.
